Chapter 3, exercise B

B Annotate the diagrams below so as to describe the actions required for the consonants in the middle of the word *implant*. Make sure that your annotations mention the action of the lips, the different parts of the tongue, the soft palate, and the vocal folds in each diagram. Try to make clear which of the vocal organs moves first in going from one consonant to another. The pronunciation illustrated is that of a normal conversational utterance; note the position of the tongue during the bilabial nasal.
